EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Antoinette Konski on September 21, 2009.

The application has been amended as follows:

Claim 36. The method of any one of claims 1, 19, 24, 29, 34 or 35, wherein the sample is selected from the group consisting of bodily fluid, blood, a dry sample, hair, skin, a fixed tissue sample, a frozen tissue sample, a tissue biopsy and a tissue resection.

Non-elected claims 7-11 have been canceled.

The title has been amended to read:

-- Polymorphisms in the ERCC1 gene for predicting treatment outcome --

The following is an examiner's statement of reasons for allowance:

1. Claims 29 and 30 have been rejoined with the elected invention in view of the amendment to these claims. It is noted that basis for the amendment to these claims is found at page 9, lines 21-31 and page 26, lines 1-5 of the specification as originally filed. Further, provisional application 60/400,253 provides support for these amendments at page 21, lines 20-25 and page 12 line 29 to page 13, line 10.

2. In view of the amendment to claim 36, this claim is entitled to priority to application 60/400,253, filed July 31, 2002. Basis for the recitation of the particular types of samples set forth in claim 36 is found at page 21, lines 3-6 and 10-12 of the '253 application. Accordingly, Park et al (Proceedings of the American Association for Cancer Research. 43: 321, abstract 1519, March 2002) is not prior art to claim 36 as amended.

3. The closest prior art of Yu et al discloses a method comprising obtaining a tissue sample from a patient having ovarian cancer and assaying the tissue sample for the presence of a T or a C at codon 118 in exon 4 of the ERCC1 gene (page 141 col. 2 through page 15, col. 1). However, Yu et al does not teach that the C/C genotype at codon 118 of the ERCC1 gene is correlated with longer survival following treatment of metastatic colorectal cancer with 5-fluorouracil and oxaliplatin, and that the T/C and T/T genotypes at codon 118 of the ERCC1 gene are correlated with shorter survival following treatment of metastatic colorectal cancer with 5-fluorouracil and oxaliplatin. Accordingly, the prior art does not teach or suggest the presently claimed methods for selecting a therapy comprising 5-fluorouracil and oxaliplatin to treat a human metastatic colorectal cancer patient comprising screening for the genotype at codon 118 of the ERCC1 gene, the claimed methods for treating a human metastatic colorectal cancer selected for therapy based on the presence of a C/C genotype at codon 118 of the ERCC1 gene comprising administering 5-fluorouracil and oxaliplatin to the patient, wherein the patient was identified by a method comprising screening a sample from the patient for the genotype at codon 118 of the ERCC1 gene, or the claimed methods for

determining whether a human patient with metastatic colorectal cancer is likely to experience shorter or longer survival following treatment with 5-fluorouracil and oxaliplatin comprising assaying for the genotype at codon 118 of the ERCC1 gene, wherein the presence of the C/C genotype indicates that the patient is likely to experience longer survival following said treatment and the presence of the T/T or T/C genotypes indicates that the patient is likely to experience shorter survival following said treatment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carla Myers whose telephone number is 571-272-0747. The examiner can normally be reached on Monday-Thursday (6:30-5:00).
